Gaggle Platform User Guide  /  Safety Tab                                                          • • •

# How does the Dashboard differ for district-level and school-level administrators?

Created by Corey Tutewiler
Last updated Apr 04, 2016

Your access level will determine what information you can view in the Gaggle Safety Management Dashboard.

District Masters and District Administrators will have access to viewing data for all schools in the district. Also, district-level users can view the **Incidents Per School** graph which shows the number of student inappropriate incidents that occur by school. For these users, moreover, a **Top Concerns** graph will not display by default, because a single school needs to be chosen in the **Select school** drop-down at the top of the interface.

School Masters and School Administrators will have access to viewing data for a single school in the district. The Incidents Per School graph is not available for these users. Instead, they have the ability to view a Top Concerns graph, which displays the students who have are responsible for the highest number of inappropriate incidents discovered by Student Safety Representatives.
